

# Circular about the current situation by Hatun Khuyaq Juan Camargo Huaman (Master of the Tradition of the Andes)

April 2020

May the Pacha Mama (Mother Earth), the tutelary gods and the beings of the Cosmos, the avatars and the deceased masters of light pour out their blessings for our protection in these moments of confusion, and may the seekers of light of Yachay and of other paths move forward in the midst of reality and presence in life (PACHA) for our elevation.

To the hearts of Yachay (the Spiritual Path of Knowledge of Mother Earth):

May the Pacha Mama with her tutelary gods give us the COURAGE, the STRENGTH and the necessary WILL to ACCEPT this situation and to continue life (PACHA) in order to fulfill our fate as human beings, namely to SERVE our fellow human beings, Mother Earth, the Cosmos and Pacha Kamaq (Andean Concept of God).

Everyone knows the problem with the corona virus and at the same time there are so many theories and a lot of information that are altogether very contradicting, and it's certainly hard to find our way around. It is WISE to TAKE CARE OF YOURSELF and be PRUDENT in the face of this situation; and also not to take into account the large amount of information, which is full of fears and apprehensions, because it conditions your vibrancy and weakens the immune system. We now need a strong immune system to face this global problem.

Some of you may not agree with the following lines, but I believe it is necessary to say so. What I am telling you is a personal opinion because I think I have the right to express an opinion. So personally, I am not upset about this global problem with the corona virus, as I see Mother Earth RECOVERING and regenerating from the chaos she was in.

I remember when we had a discussion 45 years ago with some experts in ecology, and we came to the conclusion that Mother Earth is about to die and that if we want to save her we need to STOP EVERYTHING (not working, not using machines, closing the factories etc.), and we asked ourselves: but how are we supposed to stop all this! It was impossible. Today the corona virus brings everything to a standstill and Mother Earth is gradually beginning to regenerate and purify herself.

In this context we need to cherish life. Because for me and others, Mother Earth is the MOST IMPORTANT thing; when Mother Earth dies, humans, living beings, animals, plants and all of nature disappear, for we all live thanks to the unknown and known forces of Pacha Mama (Mother Earth). I don't want fathers and sons to fight for half a glass of water in future generations. We can see my reasons for this opinion in REALITY, because the air, the water, the earth are now also cleaning themselves, and so do other living beings awake from their state of exhaustion and breathe a sigh of relief after the excessive pollution.

More of these facts can easily be found in the various news stories about the earth. The air is purified, the contaminated cities breathe a sigh of relief, even the number of deaths from environmental pollution is decreasing. And one could list even more positive effects.

We at Yachay are guardians and staunch warriors who defend Mother Earth (Pacha Mama), because we know that Mother Earth lives, she has eyes to see, ears to hear, female feelings

and actions, a high level of intelligence and a deep wisdom - in the end she is a MYSTERY. As the ancients say, the feminine, Mother Earth, death, love is a MYSTERY.

On the divine level, Mother Earth is the reflection of the DIVINE MOTHER, who is beyond the FATHER, and whose ONLY language of relationship is LOVE. In Andean thinking we call her MAMA PACHA, and she is in deep connection with the PACHA MAMA (Mother Earth), who is the mother of humanity (we are the children of Mother Earth). That is why she always puts our food on the table for us, in the morning, at noon and in the evening, like a living mother who takes care of her child (the human being).

For us, the PATH Yachay (the Spiritual Path of Knowledge of Mother Earth) is the spiritual path of matter today: that is, a spiritual elevation through matter and through the reality and presence of life (PACHA).

In this way we persistently strive to find the Spirit or SELF in our inner temple of our body. That is why it is so important for us to take care of it. In order to awaken the body to the spirit, it is also necessary to maintain the harmony and balance of mankind with Mother Earth and with Father Heaven. We all know that an imbalance and disharmony of Mother Earth, especially of her elements air, earth, fire and water, can cause chaos on all levels, such as diseases, epidemics, catastrophes, wars etc., and why not Corona virus too.

We, the brothers and sisters of Yachay, also take care of the soul of Mother Earth, which has been forgotten by humanity, by means of OFFERINGS and RITUALS. Almost everybody is taking care of the physico-chemical aspects of Mother Earth. Only peoples and cultures with a philosophy of nature think of the soul of Mother Earth and know her needs. The same way as man has needs, like the food of Mother Earth, and other things, Mother Earth also needs offerings from us as a gesture of gratitude. But man only thinks of exploiting nature without paying attention to the soul of Mother Earth.

The greatest mistake man made is, that he forgot to thank Mother Earth for her benefits. In the Andean tradition, the Pacha Mama is asked what should be grown and it is she who decides what is sown and what is not sown. The Andean tradition not only cares about the harmony and balance of the soul of Mother Earth, but also tries to purify the etheric garbage of the thoughts and feelings of man, which in one way or another poison Mother Earth. In order to maintain the balance, in the Andean tradition, sacrifices are made on solstices and equinoxes, which in all traditions of nature are the basis for the harmony of Mother Earth.

In summary, every person is fused with mother earth and its elements air, earth, fire and water, and we can look at it this way: Your body, your bones represent the earth, the liquid part of your body, such as blood, urine, sweat, represent the water, the air your intelligence and the fire your senses.

I think the physicists say that every particle of matter is related to everything that surrounds it on earth and in the cosmos in general. I remember Paracelsus saying that when you pick a flower in the field, a planet or a star moves in the sky. That is, humans have a great influence on nature, sometimes a decisive influence.

Naturopaths also speak of this relationship with the planets and apply this knowledge in sowing (biodynamic agriculture) or in healing. In the past, the principle of similarity between plants and the different parts of the body was also used. That is, if a plant is similar to a human organ, the plant is good for that organ. For example, the liverwort, whose leaves are

similar to the lobes of the liver, is used to heal diseases of the liver; the dried fig is good for the prostate because it is similar to the man's scrotum. But there are also plants that work on the level of the soul, such as the yellow jasmine (Gelsemium), which is good for anxious, nervous, restless people.

Also, if we are concerned, restless, anxious, or frustrated, and visit a river or waterfall or lake and just look at it, the river or waterfall takes away our condensed and negative thoughts and we become more enthusiastic and clearer. This happens because through the look you came into contact with the soul of the river or the waterfall or the lake and the invisible power of the river has purified, harmonized and strengthened you. Even if you walk under the trees in a forest, you will return renewed and healed. Or when you climb the mountains you will also be transformed.

Everything that has been said so far shows us our deep connection with Mother Earth. Because Mother Earth always takes care of her children (humanity), to the extreme that she warns us of diseases months, weeks or maybe even years in advance and, as a healing, lets the medicinal plants that you need grow in your garden. But we cannot read this message from Mother Earth and so we tear up the plant as if it were a bad weed and so throw away our own medicine. This all happens because we don't know the laws of nature.

To understand the current situation, we have to remember the fires of the past year and the natural disasters such as earthquakes, floods, snowfalls, storms or droughts, etc. of the past years. All of this was like a message from Mother Earth speaking to us with her natural symbols. But we have forgotten to read this language of nature because we have strayed too far from it.

If we talk about our situation now, then we know that, as scientists say, the corona virus primarily destroys the lung tree and blood vessels. So if we remember the forest fires where thousands of trees were burned, we can say that Mother Earth's lungs also caught fire, and sometimes the fires were beyond control. If we look at it symbolically, then the corona virus represents the fire that destroys and burns our lung and tracheal trees, and sometimes our tree of life as well. If we continue reading this situation symbolically, then the element water was used in the fires to control and extinguish the fire. And after that the sadness and the confusion about this destruction of nature remained. In this case, the water represents the sadness, worry and fear of the person, a feeling of confusion, and most importantly, disorientation.

If we want to talk more deeply about water, then we can say that the water of rivers, lakes and seas etc. represents the blood of Mother Earth. But man has polluted and poisoned it, and Mother Earth tries to "alchemize" that, but the pollution is too dense. Therefore, Mother Earth is sad and sometimes weeps.

Sometimes we don't realize how much we attack Mother Earth by breaking her principles and rules. We all know that this disharmony will have consequences. Since Mother Earth is very related to man, the blood of man is also contaminated. In the Andes they say when a person wishes or does something bad to his fellow man: this person has "bad blood".

That means, when we attack Mother Earth, we attack OURSELVES because we are completely connected and fused with her.

So we see that Mother Earth has warned us with her messages, like a mother who loves her children, but we cannot hear them because we have crystallized in our worldly desires. For example, most people no longer think about the health of their body (temple), it is forgotten, sometimes people even don't want to know anything even though they knew better, or they even reject their body. Many of our brothers and sisters do not think of Mother Earth and her needs in order to be in balance.

That means it is not only about the pollution and the destruction of the balance and harmony of Mother Earth. The most important thing is the harmony and balance of people on their various levels, especially their attitudes and feelings. For this equilibrium man needs harmony within himself. Some are infected with the virus due to disharmony inside.

Some thinkers say that the virus comes from within, through our negative aspects. This means that man himself creates his various diseases. But in Andean thought there are diseases that come from within, and diseases that can come from without. Many are unaware of the diseases that certain natural elements can cause, such as wind disease, which is caused by the wind itself. There are also diseases caused by water, earth or fire, and also by some mighty plants that have a strong astral body?.

But in general, many people no longer think about health today. They only care about their work and money and forget about THEMSELVES, and as a result, the person is stressed, has many problems and no time and is therefore far from the natural. In the Andean world, OFFERINGS are very important as a gesture of gratitude and above all to fulfill the natural law of GIVING and RECEIVING, and often also for individual healing. The OFFERINGS and rituals also heal the soul of Mother Earth. The Andean world, as the oldest civilization, knows that OFFERINGS to Mother Earth ARE of great importance for maintaining the harmony of Mother Earth with Heaven and mankind.

We at Yachay, the Way of Mother Earth, have the responsibility to raise human awareness to help Mother Earth so that future generations can live better and so that we preserve our dignity before these future generations. Because currently Mother Earth is sick and sad.

Brotherly,

HATUN KHUYAQ

¡KALLPA! ¡KALLPA! ¡KALLPA!

Recommendations:

Take care of your body like a temple!

Pay attention to your thoughts!

Control your wishes, your attitudes and words!

Fulfilling the law of service is human!

Fulfill the laws of life of giving and receiving!

In this way you will cooperate for the balance and harmony of Mother Earth!

Yachay is a spiritual path. The initiatory school PAQARINA is its manifestation in the world where the thinking of the Andean tradition for human regeneration is taught. PAQARINA is located in Cusco, in the Sacred Valley of the Incas (Urubamba / Yanahuara), and opened its doors in March 2020.

#### INVITATION TO A MEDITATION TO HELP MOTHER EARTH:

In this meditation you need certain gestures and words that you can only learn with guidance. Every Wednesday, 6 p.m. - 7 p.m., there is a online- practice evening in Yachay, where it can be learned.

If you are interested, please register so that we can send you the access link:  
milena.gartler@gmx.at, lisastipsits@gmx.net

This knowledge will be deepened in the book of Hatun Khuyaq.
